Response to Intervention Framework in Mathematics

Response to Intervention (RtI) is a framework for supporting students who are potentially at risk and assisting them before they fall behind. RtI is grounded in high quality core classroom instruction for all students which is then supplemented as necessary by progressively more intensive interventions for students who may struggle with reading or mathematics. Key components of RtI are periodic universal screening to determine which students may need additional instruction and ongoing progress monitoring to ascertain the effectiveness of additional instruction. The RtI framework represents a continuum and is often depicted as a triangle with three tiers of progressive intensity.

Montana Response to Intervention: RTI Framework Jigsaw Activity

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

Recommended Practice: Screen all students for potential math difficulties and monitor their progress

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

Key Concepts

- “ Monitor students regularly
- “ The Rtl team evaluates screening measures using reliability, efficiency, and validity criteria
- “ Implement twice a year screening

Create a T-chart

- “ Please create a T-chart on your paper
- “ Label one column effective screening system
- “ Label the other column functions of progress monitoring
- “ As you listen to the overview, list the recommended components of an effective screening system

Screen all students for potential math difficulties and monitor their progress

Multimedia Overview: Screening and Monitoring Progress in Math (5:34)

After overview: Share your key points on your T-chart with your table partners

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

Montana Assessment System

- “ Jigsaw Activity
- “ Number off from 1-5
- “ Each person reads one assessment section
- “ Once you have read your section, share the key information with your table partners

Screen all students for potential math difficulties and monitor their progress

Expert Interview: Universal Screening in Math (5:47)

Anne Foegen, Ph.D., Iowa State University

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

Activity

” Examine Resource list from Montana OPI Title I conference

1. What do you notice about the information provided?

2. How would this help you in your initial stages of selecting a screening tool?

” Chart your team responses on a chart paper

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

Screen all students for potential math difficulties and monitor their progress

Expert Interview: Functions of Progress Monitoring

Anne Foegen, Ph.D., Iowa State University

Listen for the key points on why progress monitoring is essential

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

Screen all students for potential math difficulties and monitor their progress

Presentation: Monitoring Student Progress

- “ Listen for actions taken by teacher and team
- “ Record each action mentioned

Self Assessment on Screening and Progress Monitoring tools

” Examine: **Self assessment tool for data utilization with screening and progress monitoring tools**

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

**Recommended Practice: Focus interventions
on whole and rational numbers, word
problems, and fact fluency**

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

Key Concepts

- “ **Focus kindergarten through fifth-grade interventions on whole numbers**
- “ **Focus fourth- through eighth-grade interventions on rational numbers**
- “ **Ensure in-depth coverage of math topics**
- “ **Interventions on solving word problems should include instruction that helps students identify common underlying structures**
- “ **Interventions at all grade levels should devote about ten minutes each session to building fluent retrieval of basic arithmetic facts**

Focus interventions on whole and rational numbers, word problems, and fact fluency

” Multimedia Overview: The Content of Math Interventions (5:47 min)

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

Tier II and Tier III content

Elementary: In depth treatment on a limited # of topics-K-4

1. Whole number
2. Strategic counting
3. Number composition
4. Understanding place value
5. Solving problems with whole numbers
6. Underlying meaning of addition and subtraction operations

Tier II and Tier III content

Middle School

1. Rational numbers and Operations with fractions, ratios, decimals and percents
2. More complex whole numbers, multiplication and division

Focus interventions on whole and rational numbers, word problems, and fact fluency

A SYNOPSIS OF A SYNTHESIS OF EMPIRICAL RESEARCH ON TEACHING MATHEMATICS TO LOW-ACHIEVING STUDENTS

Jigsaw OPI document

- ” Number off 1-5
- ” Read your section
- ” Share the key points from your section with your table partners

Focus interventions on whole and rational numbers, word problems, and fact fluency

Expert Interview: Math Content for Struggling Students

Sybilla Beckmann, Ph.D., University of Georgia

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

Foundations of Arithmetic

“ K-5 recommends focus on numbers and operations

- . Used to tell us how many things
- . Place value, decimal system
- . Operations (addition, subtraction, multiplication, division)
- . How they work, why they work

Montana
Office of Public Instruction
Denise Juneau, State Superintendent

opi.mt.gov

Foundations of Arithmetic

- “ 4-8 Focus on Fractions and Rational number ideas
- . What fractions mean, what they stand for
 - . Solve a variety of story problems
 - . Reasoning behind methods of calculation for problems they are solving

Compare recommendations to Montana State Standards

Math Performance Standards (Grade Level Expectations) Grades K-2

Content Standard A: Mathematical facts, concepts, principles, and theories Numeration: Understand and use numeration

Numeration Performance Standards that apply to grades K-3: M1.1.1 Read, write, order, count, and model one-to-one correspondence with whole numbers to 100. M1.1.2 Use, model, and identify place value positions of 1's, 10's, and 100's. M1.1.3 Model and explain the processes of addition and subtraction, describing the relationship between the operations. M1.1.4 Select and use various representations of ordinal and cardinal numbers. M1.1.5 Identify, model, and label simple fractions, describing and defining them as equal parts of a whole, a region, or a set. M1.1.6 Identify, describe, and extend patterns inherent in the number system. Skip count by 2's, 5's, and 10's. Add and subtract by 10. Identify even and odd numbers. M1.1.7 Demonstrate the commutative and identity properties of addition.

Understanding Numbers

Kindergarten	Grade 1	Grade 2	Grade 3
<p>The student demonstrates conceptual understanding</p> <ul style="list-style-type: none"> of whole numbers to 20 by <p>[K] N-1 demonstrating 1-1 correspondence (M1.1.1)</p> <p>[K] N-2 recognizing and counting whole numbers from 0-20 (M1.1.1)</p> <p>[K] N-3 writing and ordering whole numbers from 0-20 (M1.1.1)</p> <p>[K] N-4 counting whole numbers backwards from 10 to 0 (M1.1.1)</p> <p>[K] N-5 identifying ordinal position, first to the tenth (M1.1.4)</p> of simple fractions <p>[K] N-6 dividing an even numbered set of concrete objects (up to 20) into halves (M1.1.5)</p> <p>[K] N-7 identifying halves (M1.1.5)</p> 	<p>The student demonstrates conceptual understanding</p> <ul style="list-style-type: none"> of whole numbers to one hundred by <p>[1] N-1 reading, writing, ordering/counting and modeling correspondence of whole numbers</p> <p>[1] N-2 comparing whole numbers using the words greater than, less than or equal to</p> <p>[1] N-3 identifying ordinal position, first to the twentieth (M1.1.4)</p> of simple fractions <p>[1] N-4 dividing an even numbered set of concrete objects (up to 50) into halves (M1.1.5)</p> <p>[1] N-5 dividing geometric shapes into equal halves, fourths, and thirds (M1.1.5)</p> 	<p>The student demonstrates conceptual understanding</p> <ul style="list-style-type: none"> of whole numbers to one thousand by <p>[2] N-1 reading, writing, ordering/counting and modeling correspondence of whole numbers (M1.1.1)</p> <p>[2] N-2 modeling and identifying place value positions: ones, tens, and hundreds (M1.1.2)</p> of simple fractions <p>[2] N-3 identifying fractions as equal parts of a whole, a region, or a set (M1.1.5)</p> <p>[2] N-4 reading and writing numerals for simple fractions (M1.1.5)</p> 	<p>The student demonstrates conceptual understanding</p> <ul style="list-style-type: none"> of whole numbers to one thousand by <p>[3] N-1 reading, writing, ordering, or [counting L] (M1.1.1)</p> <p>[3] N-2 modeling (base ten blocks) or identifying place value positions to thousands (M1.1.2)</p> <p>[3] N-3 using appropriate representations of ordinal or cardinal numbers (M1.1.4)</p> of simple fractions with denominators 2, 3, 4 or 10 by <p>[3] N-4 identifying, describing with explanations, or illustrating equal parts of a whole, a region, or a set (using models) (M1.1.5)</p> <p>[3] N-5 identifying, describing with explanations, or illustrating equivalent representation of fractions (using models) (M1.1.5)</p>

Planning for Visual Representations

<http://dwww.ed.gov> DOINGWHATWORKS

Planning for Visual Representations

This planning document is designed to help interventionists provide Tier 2 and Tier 3 mathematics instruction that incorporates visual representations as part of the concrete-representational-abstract (CRA) sequence. The completed planning worksheet serves as a detailed lesson plan to guide implementation and a record for future use.

Planner	
Lesson objective	<i>(e.g., add fractions with unlike denominators)</i>
Systematic analysis of problem-solving steps and thinkaloud script notes	<i>(e.g., ensure that the denominators are the same, multiplying denominator and numerator by same number as necessary; add the numerators; simplify the fraction)</i>
Choice of concrete materials for demonstration of steps	<i>(e.g., fractional parts of circles)</i>
Options for representation for demonstration of steps including sketch	<i>(e.g., strip diagram)</i>
